

INFRARED OPTICAL COATINGS

Enhancing Performance of Infrared Optical Elements

- Comprehensive coatings for the infrared optical industry
- Widest infrared spectral range and highest throughput
- Protective and solderable options
- Designed specifically for infrared optical performance

Spectral Systems is the technical and commercial leader in the field of infrared optical coatings for spectroscopy. Our coating products and services provide a complete offering of performance enhancement for refractive and reflective infrared optical elements. Our proprietary coatings have been developed and enhanced over the 30 plus years of our existence. We continue to offer the highest performance coatings in the infrared optical industry.

All of Spectral Systems' optical coatings are designed specifically for the infrared spectral region of choice. This provides you with maximum throughput, durability and highest spectral integrity free of material artifacts.

Our infrared optical coatings are exceptional. Spectral Systems have developed the XP-BBAR™ (broad-band anti-reflective) and XP-NBAR™ (narrow-band anti-reflective) coatings to provide the highest IR throughput over the widest infrared spectral range available in the infrared optical industry. This spectral range provides you with the widest and most complete infrared information and performance.

Spectral Systems is the largest and most comprehensive supplier of infrared beamsplitters world-wide. Our Photon Pro™ beamsplitter coatings are uniquely developed for highest throughput, flat frequency response and highest spectral purity while providing the desired transmission/reflection split of the infrared beam.

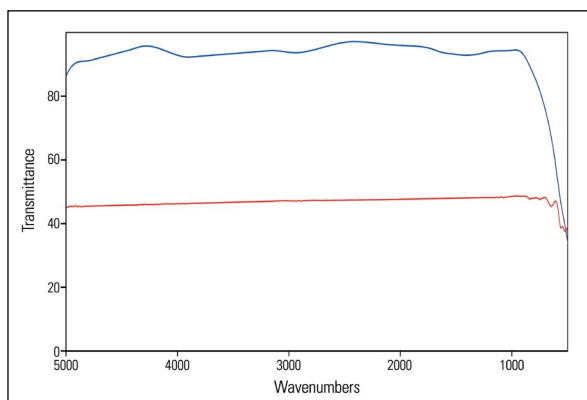

Generally our coatings can be grouped into six categories

Beamsplitter Coatings	Provide transmission and reflection of the incident IR beam.
Anti-Reflective Coatings	Improve throughput especially for higher refractive index materials such as zinc selenide and germanium.
Bandpass Coatings	Provide a specific spectral range of transmission for optimum performance in a defined spectral region.
Reflective Coatings	Improve reflectivity of optical elements such as bare aluminum within a selected spectral region.
Protective Coatings	Prevent or reduce degradation of optical elements from exposure to elevated humidity or abrasive contact.
Connective Coatings	Improve or enable melding of optical elements such as making a refractive optical element solderable to a metal plate.

WWW.SPECTRAL-SYSTEMS.COM

Working closely with our customers over our long history has enabled us to develop and optimize protective coatings exceptional for use with infrared optical elements. Our XP-Halide™ and XP-Polymer™ coatings provide high performance and superior protection from high humidity environments. Our CERAMSpec™ coating is designed to minimize abrasion from physical contact.

Transmission spectra of a germanium (Ge) window with and without Spectral Systems XP-BBAR coating

Often it is desirable to use two different optical coatings on one optical element. An example of this combined use would be layering our XP-BBAR coating with our abrasion coating on the faces of an ATR crystal to maximize throughput and to minimize the expected wear from sample contact.

Many companies can offer coatings for products. Spectral Systems offers the highest performance coatings for the infrared optical industry.

The following list of part numbers includes many of the unique coatings we offer our customers. Many of our offerings are not listed here since they require specific design for your application. If your requirement is not described here, please call us for additional and/or customized offerings.

ORDERING INFORMATION

Anti-Reflective Coatings

DESCRIPTION	PART NO.
Al ₂ O ₃ XP-NBAR, 0.8–2.5 μm	999-5398
AMTIR™ XP-BBAR, 2–20 μm	999-0002
CdTe XP-BBAR, 1.8–20 μm	999-1113
Diamond XP-BBAR, 2.6–20 μm	999-1814
Quartz XP-NBAR, 0.8–1.1 μm	999-2706
Ge XP-NBAR, 3.8–10 μm	999-0208
Ge XP-NBAR, 2–5 μm	999-0900
Ge XP-NBAR, 7–14 μm	999-9101
Ge XP-BBAR, 2.5–20 μm	999-9017
Si XP-NBAR, 2–5 μm	999-0869
ZnS (Cleartran™) XP-BBAR, 2–14 μm	999-0212
ZnSe XP-BBAR, 1.1–20 μm	999-0110
ZnSe XP-BBAR, 1.6–20 μm	999-0160
ZnSe XP-BBAR, 2–14 μm	999-0100
ZnSe XP-NBAR, 7–14 μm	999-9147
ZnSe XP-NBAR, 8–12 μm	999-9174
ZnSe XP-NBAR, 0.6–1 μm	999-9046

Beamsplitter Coatings

DESCRIPTION	PART NO.
BaF ₂ Photon Pro 2–12 μm	999-9434
CaF ₂ Photon Pro 0.8–10 μm	999-9050
CaF ₂ Photon Pro 0.6–8 μm	999-9004
CsI Photon Pro 2–50 μm	999-9012
CsI Photon Pro 2–40 μm	999-9018
KBr Photon Pro, 1–25 μm	999-0157
KBr Photon Pro, 2–25 μm	999-1378
KBr Photon Pro, 1–28 μm	999-6571
KBr Photon Pro, 1.5–25 μm	999-9045
KBr Photon Pro, 2–28 μm	999-8379
KBr Photon Pro, 2–28 μm	999-9066
KBr Photon Pro, 0.6–1.0 μm	999-6790
Quartz Photon Pro, 0.6–3.6 μm	999-9130
ZnSe Photon Pro, 2–20 μm	999-9016
ZnSe Photon Pro, 0.6–1 μm	999-9048

Protective Coatings

DESCRIPTION	PART NO.
CERAMSpec	999-0400
KBr XP-Halide, 0.4–28 μm	999-0200B
XP-Polymer	999-1360

Reflective Mirror Coatings

DESCRIPTION	PART NO.
Aluminum Front Face Reflector	999-0300
Gold Front Face Reflector	999-9010

For options not shown here, please contact Spectral Systems.
